

Fair Trade

We pay farmers fairly for their superb crop.

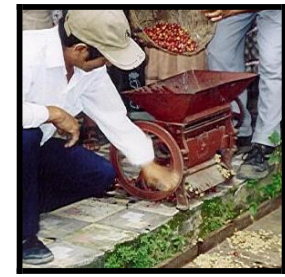

In recent years, profiteering by specialty coffee roasters has forced small coffee farmers into extreme poverty. At The Earth Friendly Coffee Company, we pride ourselves on paying a fair price for superb quality coffee beans. This practice creates a sustainable and prosperous future for farmers and their families.

Shade Grown

We only buy coffee produced in the shade of the rainforests.

Our coffee beans are harvested from coffee trees that grow in the shade of the rainforest. This practice helps maintain the Earth's precious rainforests, as well as the lives of the animals that live within them. The coffee that comes from these shaded farms is mellow and flavorful with minimal impact on our environment.

Chemical-Free

Our coffee is free of harmful chemical agents.

Only natural mulch and organic fertilizers are used to cultivate the small farmer's precious coffee trees, producing a coffee from the Earth, for the Earth's people.

Dark Roast Coffee*

Guatemalan Dark Roast. Bold & intense taste, rich & lively aroma. Fair trade, chemical-free, shade grown.
